03 MODIFY THE FINISHED EFFECT

LONGER OR STRONGER

Redstone → longer time (see the table)

Glowstone → higher level (II, or Slowness IV)

Choose one. You cannot combine both upgrades.

THROW OR LEAVE A CLOUD

Drinkable + gunpowder → Splash

Splash + dragon’s breath → Lingering

Brew the effect, then upgrade, then change its form.

DON’T MISS THESE DETAILS

- Weakness skips nether wart: Water bottle + fermented spider eye.
- Fermented spider eye = spider eye + sugar + brown mushroom (crafting).
- Turtle Master II = Resistance IV + Slowness VI; normal = Resistance III + Slowness IV.
- Splash/lingering timers differ from this table; check the bottle tooltip and impact distance.
- Mundane/Thick have no useful Survival branch. Luck/Decay cannot be brewed in Survival.
